
High Order Testing defect log for Team 24

Team 21 Readly

Nihanshu Purohit, Aviral Mansingka, Sidhant Chadda, Sidhant Chitkara

Defect #	Defect Description	Defect Severity	Type of High Order Testing	Test Case # or Description.
1	User not able to sign-in to their own accounts sometimes.	1	Performance Testing	Entered User sign-in credentials correctly and clicked sign-in but failed to sign-in
2	User not able to sign-up to their own accounts sometimes.	1	Performance Testing	Entered User sign-up info and clicked sign-up but failed to sign-up
3	My courses page fails or takes too long to load sometimes	3	Performance Testing	Looking up the courses created by the user.
4	Server becomes unresponsive when we input large non-alphanumeric text while creating a course	2	Volume Testing	Create-Course 001
5	Adding too many courses continuously crashes the server and also affects the mapping of courses and their details on the All courses page.	1	Stress Testing	Creating multiple courses with valid fields continuously.
6	Adding the courses that already exist crashes the server instead of giving an error notification message or handling the server error.	2	Performance Testing	Creating multiple courses with the same data input.
7	"My courses" list is blank every time user logs in	1	Usability testing	Viewing my courses as a user
8	Users are not able to leave the course.	1	Usability testing	Leave Course 001

9	Clicking on a course in "All courses" opens the page for the next course in the list	1	Usability testing	Creating multiple courses with different information and verifying the information for the respective course on All Courses page.
10	The same user can be added multiple times to a particular group.	2	Usability testing	Adding user to a group.
11	Users are unable to leave the group although there is a success notification.	1	Usability testing	Removing a user from the group
12	After the user attempts to leave the group, the undo button from the faulty success notification adds the same logged in user again to the group.	2	Usability testing	Checking undo functionality
13	Clicking on last course in all courses list fails to load, crashes server	1	Usability testing	Creating multiple courses with different information and verifying the information for the respective course on All Courses page
14	Adding too many groups simultaneously crashes the server	1	Stress Testing	Creating multiple Teams with valid credentials.
15	Courses only appear in the My courses page after they have been opened from the All courses page	2	Usability testing	Creating multiple courses should automatically populate my courses page
16	Able to access secure routes even if the user has logged out of the account. Such as my courses.	3	Security Testing	Logout and login 001
